SUMMARY

Aspiring Software Engineer passionate about building technology that solves real-world problems. In today's AI-driven world, I want to use my coding skills and AI to create useful tools that help people. I am a dedicated team player eager to start my career and contribute to your team.

EDUCATION

Presidency University

BTech - Computer Science and Engineering

Web Development, DSA, Computer Networks, Operating Systems, Cryptography & Cybersecurity, Mobile development, DBMS

Bangalore

2021 – 2025

WORK EXPERIENCE

Freelance Full Stack Developer : roadroam.in | **Typescript, React.js, Node.js, Tailwind, SQL, Cloudflare**

- Architected a serverless **full-stack application** using **React**, **TypeScript**, and **Cloudflare Workers**, achieving global low-latency performance with zero idle infrastructure costs.
- Developed a robust REST API with **Hono** and **Cloudflare D1** (SQLite) to handle booking transactions, enforcing strict server-side validation for data integrity.
- Engineered a secure Admin Dashboard protected by **Cloudflare Zero Trust Login**, implementing custom session handling, integrated Google Maps API to build a custom location picker with autocomplete and geocoding.
- Automated transactional emails using **Resend API**, triggering instant confirmations and admin alerts.

UNIVERSITY PROJECTS

Smart Bookmarks | **Next.js, Supabase, Tailwind CSS** | smart-bookmark-app-lime.vercel.app

- Built a real-time bookmarking application with full CRUD capabilities, authenticated via **Supabase** and secured with **database-level RLS** policies.
- Maximized client-side rendering speeds during complex data filtering by utilizing React useMemo and CSS-driven DOM retention techniques to prevent image flickering. | github.com/Ashfaq-codez/smart-bookmark-app.git

AI-Powered Chatbot for Mining Act Queries | **Python, FastAPI, FAISS, HuggingFace**

- Engineered a high-performance Retrieval-Augmented Generation (RAG) pipeline to interpret and answer complex legal queries regarding the Indian Mines and Minerals Act.
- Implemented semantic search using **FAISS** (Facebook AI Similarity Search) and **HuggingFace** embeddings to achieve sub-second retrieval of relevant legal document chunks.
- Developed a lightweight, asynchronous REST API using **FastAPI**, optimizing the system for concurrent user requests and real-time processing. | github.com/Ashfaq-codez/mining_chatbot

Space Organizer | **Java (J2EE), Servlets, JSP, MySQL, Bootstrap, HTML5/CSS3**

- Designed a robust FullStack MVC (Model-View-Controller) architecture using **Java Servlets** and **JSP**, separating business logic from the user interface. front-end interface using **Bootstrap** and JavaScript, ensuring cross-device compatibility. | github.com/Ashfaq-codez/java-project
- Managed persistent data storage using **MySQL**, implementing CRUD operations to track user inventory.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, HTML/CSS.

Frameworks: React.js, Node.js, Express, Hono, FastAPI, Tailwind CSS.

Tools: Git, GitHub, Linux, Cloudflare Workers

EXTRA CURRICULAR

Team lead for university photography club, Cleared JEE BArch with 98 percentile, Active Basketball player
